assistive technology development

OSS Watch

open source software advisory service

Maavis@School :: Objective

IT without knowing about IT

- Moderated Access to Audio Visual
 Services
- i.e: a simplified computer interface
- Developed to become a platform, be flexible and sustainable (more later)

Maavis@School :: Motivation

- Potential population excluded from the benefits of information technology
- People with dementia; older people; children with special educational needs.
- Design challenge : create more intuitive access to IT services
- Research challenge: can we show a benefit to use of this technology?

Maavis@School :: Background

- Maavis emerged from a previous small project
 - provision of IT within residential care homes
 - Sheffield's largest residential care home
 - small scoping project in school
- Study
 - research into benefits of provision of systems
 - usability study into design of system

Maavis@School :: Requirements and technology choice

- Communications + media = web
- Easily acquired skills, common = web
- Without internet + privileges = rich client
- Open source platform = plenty of choice
- All of above = Mozilla as used in Firefox
 - Very well tested
 - Great community, cross platform
 - Some experience with Jambu

Maavis@School :: Development and Technology

- Designed for multiple engagement levels
 - User simple UI

- * X
- Non technical facilitator copy files, UI
- Technical facilitator create/edit 'web pages'
- Core developer extend platform
- Future Plug-ins extend community
- Mozilla XUL platform + VLC media player
- Outfox server provides more flexibility Skype

SS Watch

Maavis@School ::

Open Source Development Model

OSS Watch advise on open dev.

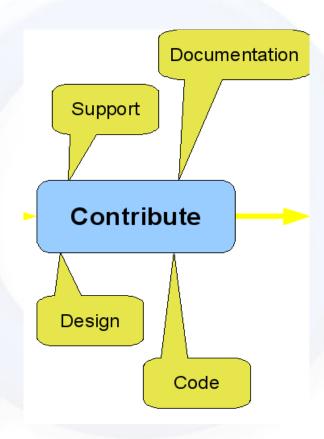

- Low cost to users
- Community of users and developers
- Innovation & sustainability
- Exploitation regional development
- "Freedom to discuss plans with anyone"
- Development forge open access

JISC

Maavis@School :: Study

- Small study
 - 3 special schools in S Yorkshire, term long trial
- user requirements scoping exercise
 - software development
- Trial:
 - Provision of system to children meeting recruitment criteria in 3 special schools

Maavis@School :: Study

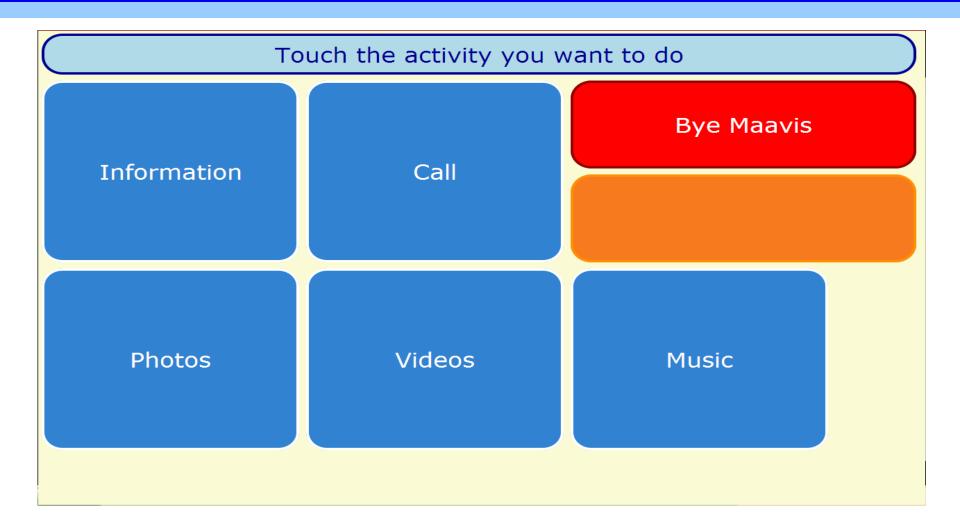

- Measuring impact of provision (and improved independent access to IT)
 - Qualitative data from teachers, students
 - Qualitative data from analysis of video evidence
 - Quantitative data from pre&post intervention assessments

Maavis@School :: User Requirements & Implementation

- Features of Maavis
- New features specific to SEN
 - Switch access with scanning
 - Simple Log-in pages

Maavis@School :: Top level screen

Maavis@School :: Photo collection chooser

Maavis@School :: Potential

- Project team believe Maavis has great potential
 - Use in many 'sectors' to provide accessibility for people otherwise excluded from IT
- Unique in several senses
 - Functionality
 - Platform choice and flexibility
 - Evidence based
 - Can be used as a platform for other things, e.g. tele-health

Maavis@School :: Future Plans

- Several other bids using Maavis
 - Nominet internet delivery of content
 - Knowledge Transfer deployment and training resources within FE
 - Exploitation bids

Maavis@School :: Summary

- Maavis is designed to simplify access to IT
- Potential across a number of applications
- Small study looking at benefits within special schools
- Unique and flexible architecture and technology
- Ripe for further potential
- Open Source
